EDUCATION

DigitalCrafts Web Development Cohort   **Atlanta, GA**
Full-Stack Web Development Certification   *Graduation Date: November 2023*

- Completed an intensive coding boot camp specializing in Full-Stack Web Development.
- Demonstrated proficiency in various coding languages through agile methodologies
- Collaborated with multiple, diverse teams of developers to build modern and functional web applications using industry-standard development tools.

PROJECTS

Hackathon, City of Refuge   October 2023

- Participated in an event hosted by the City of Refuge and Digital Crafts, contributing to an intensive 8-hour website development sprint aimed at delivering a fully function website for practical use.
- Appointed to the backend development team, where I played a pivotal role in shaping the website's logic, incorporating about 20 endpoints to ensure robust performance. I worked in tandem with the front-end team, fostering a seamless cross-functional collaboration to validate and refine endpoints and fetch calls. This collaborative effort exemplified my ability to work within diverse teams.

Hien.TV (React.js Web Application)   October 2023

- Utilized a Movie API to develop a website enabling users to access an extensive database of over 200,000 movies and retrieve comprehensive details for any selected movie.
- Expanded the functionality by incorporating a secondary API key, facilitating the retrieval of more comprehensive movie data, such as runtime, plot, and supplementary information.

Daily To-Do List (React.js Web Application)   October 2023

- Designed and engineered a robust task management To-Do List application utilizing React.js. This application showcases an array of comprehensive features, including seamless task creation, editing, and deletion capabilities. I significantly improved task organization and efficiency for users, delivering a streamlined and user-friendly experience.

PeppaPlug (Full-Stack Web Application)   September 2023

- Implemented an interactive gallery showcasing various pepper varieties providing users the ability to add peppers to their favorites and edit and remove as they choose.
- Developed a dynamic website using EJS, Javascript, and CSS enabling seamless user registration and login functionality integrating session management to facilitate the user experience.

Dynamic Duo (Javascript & HTML)   July 2023

- Incorporated wine and dinner recipe integration via an external API, providing users with access to randomized wine and dinner recipes for an enhanced user experience.
- Aligned technical endeavors with project objectives to facilitate the generation of both introverted and extroverted date ideas from a locally-based database, enhancing user engagement.

EXPERIENCE

CPACS, Education Program Manager, Doraville GA   February 2019 – March 2021

- Orchestrated an average of 4 non-profit events per month dedicated to supporting the community.
- Trained over 10 new tutors on teaching techniques and child management techniques.
- Coordinated tutor payroll and hours, ensuring accurate and timely compensation.
- Successfully improved student academic performance, resulting in an average grade improvement of 30% following one semester of dedicated tutoring.

SKILLS & INTEREST

Programming Languages: HTML, CSS, Javascript, SQL
Libraries & Frameworks: React, Express, Bootstrap
Tools & Platforms: Git, GitHub, Node.js, PostgreSQL, Sequelize, ElephantSQL, Jira Software

Interest: Basketball, Volleyball, Exercising
